The Statue of Liberty is one of the world's finest works of art, and that's a fact. Today it stands on Liberty Island, an island in the port of New York City. But that is not where it was first built.

The Statue of Liberty was actually a gift from France. You might wonder how the Statue of Liberty got to the US. The statue didn't come in an airplane and it wasn't brought in one piece on a boat. In fact, it was broken down into smaller pieces, 350 to be exact, and was shipped to the US in 1885.

When the statue reached the island, it wasn't simply placed on the ground. The fact is that the pieces of the statue fit together onto a base that was built by the Americans. Once the statue was put together, it was over 100 meters tall and weighed more than 200,000 kilograms.

Now that you know all of these things about the Statue of Liberty, would you like to travel to Liberty Island and meet her in person?
